

Lubricant and Mineral Oil ABC

UNITI-MINERALÖLTECHNOLOGIE GMBH

new publication

The well-known and popular standard reference book “Mineralölalphabet kompakt” has been superseded by our new publication “Lubricant and Mineral Oil ABC”. The new publication “Lubricant and Mineral Oil ABC” contains around 830 terms and is an ideal reference book for those involved in the lubricant and mineral oil sectors.

In addition to a comprehensive content update for the associated product groups of fuels, lubricants and heating fuels, numerous other technical terms have been added. Due to the increased importance of HSE legislation we have added additional definitions for areas of chemicals legislation (REACH, CLP, GHS), environmental law, occupational health and safety, plus dangerous goods legislation. Also, in addition, some specific lubricant issues have been added, for example covering food grade lubricants. Numerous references to corresponding DIN/EN/ISO standards as well as references to other terms make it easier to find further information on a topic.

Furthermore, the abbreviations relevant to the industry at the end of the book were significantly

expanded. A newly included overview table with relevant test methods for the lubricant and mineral oil sector contains the corresponding ISO standards as well as cross-references to different national standards.

In order to take account of globalisation and after many requests, the reference book is published for the first time in German and English. In the English version, the corresponding German designation is given for each listed English term. Authors of the new reference book edited by UNITI-Mineralöltechnologie GmbH are Edwin Leber, Dr. Bernd Lindstaedt and Dr. Ralf Michael.

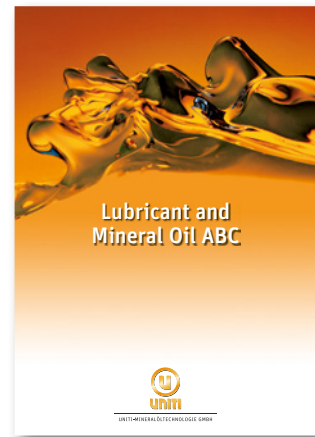

The “Lubricant and Mineral Oil ABC” of UNITI is a valuable guide to those involved in the daily work of our industry sector, especially for people working in production, management, sales, purchasing and application engineering. It appears in handy DIN A5 format and is also an ideal promotional gift; especially because an individual company imprint/logo can be printed on the cover in the lower third, and it is also possible to use the cover (front and back cover) for a complete company-individual design.
